DELA

Recycling und Umwelttechnik

DELA GmbH Dykerhoffstr.85, 59269 Beckum

Within the framework of this audit, proof was brought that the plant is qualified as a

Material preparation plant for plastics from (post-consumer) packaging

covering the following range (repeated inspection). Within the framework of this audit, audit trails for 2009 and 2010 have been checked randomly. The documentation of this audit is summarized in report No. 2010/DEL.

**Type of plant: Plastic sorting system for the sorting of packaging waste into plastic mono fractions and refuse derived fuels
(Pre-treatment plant for material utilization, material recycling and energy recovery)**

Contact person: Mr. Karl Jürgen Höhn

Input material: Plastic fractions and mixed plastic fractions from sorting systems for packaging

Output material: Plastic mono fractions and refuse derived fuel

Approved capacity: 50.000 Mg / a (Input)

Date of audit on site: 23.04.2010

Validity of Certification: 22.04.2012

The certification of qualification does not replace the required proof of material balance according to the German packaging ordinance for the recycling of (post-consumer) packaging. In case of significant technical modifications that might effect the operation –or process procedure, the certification has to be renewed.

Cologne, 24.04.2010

Dr. Holger Wisotzki

The court appointed expert for packaging waste disposal
